## DISCLAIMER

finPOWER Connect includes functionality to cater for connection to MBIE using NZ Government and the PPSR Register from version 3.04.05 onwards.

As per your Software License Agreement, it is your responsibility to make sure finPOWER Connect is fit for your purposes and you should seek independent professional advice from sources such as Lawyers, Accountants and Government Agencies.

This is a guideline only. It is not intended to be definitive and should not be used in place of legal advice. You are responsible for staying up to date with legislative changes.

This document is correct as at time of writing, but subsequent legislative changes may affect the relevance of the contents.

## REVISION HISTORY

Date	Version	By	Details
09/08/2022	1.00	AC	Created
16/08/2022	1.01	AC	Updated

## OVERVIEW

This document covers finPOWER Connect information for NZ Government and PPSR.

NZ Government covers the following API's

- NZBN Searches
- Company Entity Role Searches
- Company Disqualified Director Searches.

## SUMMARY

The New Zealand Ministry of Business, Innovation & Employment (MBIE) have updated the way in which all users interface with it, meaning a change is required within finPOWER Connect.

Currently the following versions are being retired as follows (correct as at 05/08/2022):

- NZBN version 3 is scheduled to be retired end of December 2022
- All other existing APIs are to be retired end of February 2023

Please note; if you are using any finPOWER Connect version prior to 3.03.02 then you are using NZBN version 3.

The new versions of the following are due to go live as follows (correct as at 09/08/2022):

- Companies Entity Role Search – Live
- Companies Disqualified Search - Live
- NZBN – Due late August
- PPSR – Due in September

Regardless of when the old versions are retired, you need to be set up the new API's ready for use and upgrade to 3.04.05

For more up to date information, please go to the following sites:

- <https://support.api.business.govt.nz/s/article/cloud-API-migration-schedule>
- <https://support.api.business.govt.nz/s/article/cloud-API-migration-steps>

As at today, NZBN version 5 and PPSR version 2 are not yet available. When these are available, the steps shown in the document below will work in the same way.

finPOWER Connect version 3.04.05 is a hybrid version of both the old and new interfaces for NZ Government and PPSR, as you will see further down in the document for the Cost Centre, Global Settings and User Preferences screenshots.

## LICENCE REQUIREMENTS

- Cost Centres – only required if using more than one Cost Centre.
- Securities Register.
- PPSR Interface.
- Security Enquiry

## CONFIGURATION

### OBTAINING A REALME LOGIN

If you are currently using NZ Government and/PPSR then you should already have a 'RealMe' login.

If you do not have a RealMe Login, click the RealMe Site <https://www.realme.govt.nz/> and follow the instructions on the screen.

Please Note: A RealMe login is used for a number of different NZ Companies and Government Departments e.g., applying for or renewing a Passport and accessing myIR for the Inland Revenue. Therefore, it is important that where you are using your RealMe Login for work related activities that you keep your login credentials safe and do not share these with other users.

### MBIE ACCOUNT CREATION

Please note:

- The following process is different to how MBIE credentials were previously obtained.
- You need to repeat the steps for each API e.g., Companies Disqualified Director Search.
- At the time of taking the screenshots, not all options are available.

1. Go to <https://portal.api.business.govt.nz/getting-started>
2. Click Login (top right-hand corner) and using your RealMe log into the site.

API.BUSINESS.GOV.T.NZ

Home Explore APIs Login

### Getting Started

Follow these simple steps to get up and running

1. Explore the list of APIs and find different services that you'd like to use in your own applications. Read the technical documentation to find out how they operate.
2. Log in and request subscription from the API's details screen. Our support team will confirm whether we have all the information we require, including a signed [API Access Agreement](#), and will grant access within one working day.
3. As a logged in user you can manage your test (sandbox) and production environment API access keys. Use the sandbox key and sandbox endpoints in your software development.
4. When you've completed testing, simply use your production keys to access the live services.

### Companies Disqualified Director Search

API version: v3 API definition Changelog

The Companies Disqualified Director Search API provides the facility for searching for disqualified company directors or prohibited company managers by name. See the Companies Register website for more information about [how and why directors may be prohibited](#). See [here](#) for additional information on how to use the API. A separate [API](#) is available for searching for directors and shareholders.

### API Information

You must subscribe to a product to access an API. At the end of that process you will be able to use test (sandbox) environment subscription keys to begin development. When you have completed testing, simply use the production keys to access the live services. Click [here](#) for more details.

### Products

This API belongs to the following product(s). Click a product name to subscribe.

## New Subscription - Companies Disqualified Director Search

Method of Subscription ⓘ  
Subscription key

**Please note**  
Subscription key API access is the simplest method to implement and is suitable for situations where a static access key provides sufficient security, and no end-user authorisation is required. Unique subscription keys will be created for production and sandbox use, referred to using the subscription name provided below. The subscription will continue to be valid until explicitly cancelled or replaced by you. If the subscription key is compromised, others may be able to call APIs using your key. [Click here](#) for more details.

### Subscription Details

Product  
Companies Disqualified Director Search

Subscription Name ⓘ  
Companies Disqualified Director Search

**Please note**  
This subscription will generate a production and a sandbox subscription key to authenticate to each API in the product being subscribed to. The name entered above will enable you to locate them in your subscriptions list.

Create Cancel

- Leave the 'Method of Subscription' as 'Subscription key'. Do NOT select any other option. Click 'Create'.
- This will take you back to the screen shot shown in Step #4 Repeat the above steps but this time for 'Companies Entity Role Search'. Do this also for 'NZBN' and 'PPSR' when available.
- Once you have completed the steps in #9, click on 'My Subscriptions', shown at the top of the page. You will see the page as follows:

API.BUSINESS.GOV.T.NZ

Home Explore APIs **My Subscriptions** My Applications Support Reports Profile Logout

4. Click on the **Credentials** tab and fill in the fields. The top portion of the screen will contain the 'Current Credentials' and the bottom portion contains the new 'Subscriber Keys'.

#### Current Credentials:

- **Define the service Request URL** - leave blank; enter a URL **only** if requested to.
- **Define the User Credentials** – if the Customer is currently using NZ Government, then the User Credentials will already be defined. Leave as is - **DO NOT** clear.

#### New Cloud-based API Credentials:

- **'Use for...'** – Tick the checkboxes of the services you have obtained credentials for and that you are going to use in preference to the 'Current Credentials'.  
If you tick one of these checkboxes, you must also enter a corresponding 'Subscriber Key'.
- **Subscriber Key** – Enter the Subscriber Key as obtained via the 'MBIE Account Creation' for the specific API.

5. Click the **Save** button.

**Please Note:** if **any** of the new checkboxes are not ticked and no 'Consumer Key' and 'Consumer Secret' is entered, then the NZ Government service will **not** display when performing a Credit Enquiry.

## Test Credentials tab

Credentials are **only** required on the Test Credentials page if you are doing UAT/Testing.
